DETAILED ACTION

Election/Restrictions

1. Claims 1, 3, 5-8, and 33-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected polymer, photoresist composition, and species (norbornene having a fluorine-containing ketone structure, there being no allowable generic or linking claim. Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 2, 4, and 9-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Fedynyshyn (6,468,712).

Fedynyshyn discloses a radiation sensitive composition for UV photolithography comprising norbornene monomers comprising fluorinated substituents and tertiary alcohol groups. The reference also teaches the preparation methods for such compounds. The compounds appear to meet the instant claim limitations, thus the instant claims are anticipated.
